FLOORS @ WORK

Additional Information for Steps & Risers

Using AQUA's technology of extremely stable, high performing, completely waterproof, fire retardant, skid resistant, and high-density solid core flooring that resists indentation. Aqua Plus Stairs& Risers can now be easily installed on different types of stairs bases such as concrete, ceramic, or existing flooring, allowing you to keep your flooring choice consistent throughout your project. It is environmentally friendly as it is 100% formaldehyde free and is made out of stone -plastic composite. Since it is completely waterproof, you don't have to worry about kids spilling, or pet accidents.

1) **UV Coating Layer** - Provides protection against UV rays, to help resist fading.

2) **Wear Layer** - The wear layer provides durability, stain, and scratch resistance, and adds texture.

3) **PVC Decorative Layer** - Provides stylish and lifelike reproductions of real wood surfaces.

4) **Semi-Hard PVC Layer** - A core layer provides softness underfoot and contributes to stability.

5) **Hard Stone-Plastic Composite (SPC) Layer**- The rigid SPC layer provides the strength of the flooring

AC 5 . 30 Year Warranty
